## DAISY Reading Applications

### Flexibility in accessible reading navigation

Reading has never been easier for the visually impaired than with the new **FSReader** applications used with DAISY (Digital Accessible Information System) formatted talking books. The new **FSReader** brings a host of powerful navigation options for reading. **FSReader** teams up with JAWS®, the world's premier screen reading software, to deliver easy accessibility, whether you read for pleasure, business, or school.

### Move through books your way

Download or purchase on CD DAISY 2.0 and DAISY 3.0 e-books (the ANSI/NISO standard) like those available from Bookshare.org, and browse, read, and study. Go directly to the place you want to read, either from the table of contents, by browsing headings, or even by flipping pages. Create your own bookmarks for places you want to return to quickly. Give the bookmarks your own easy to remember names. Create as many bookmarks as you like. Want to zoom past a section or review it again? In books containing recorded audio, fast forward, rewind and even speed up the narrator. When you return from a break and are ready to start again, open your book to exactly where you left off.

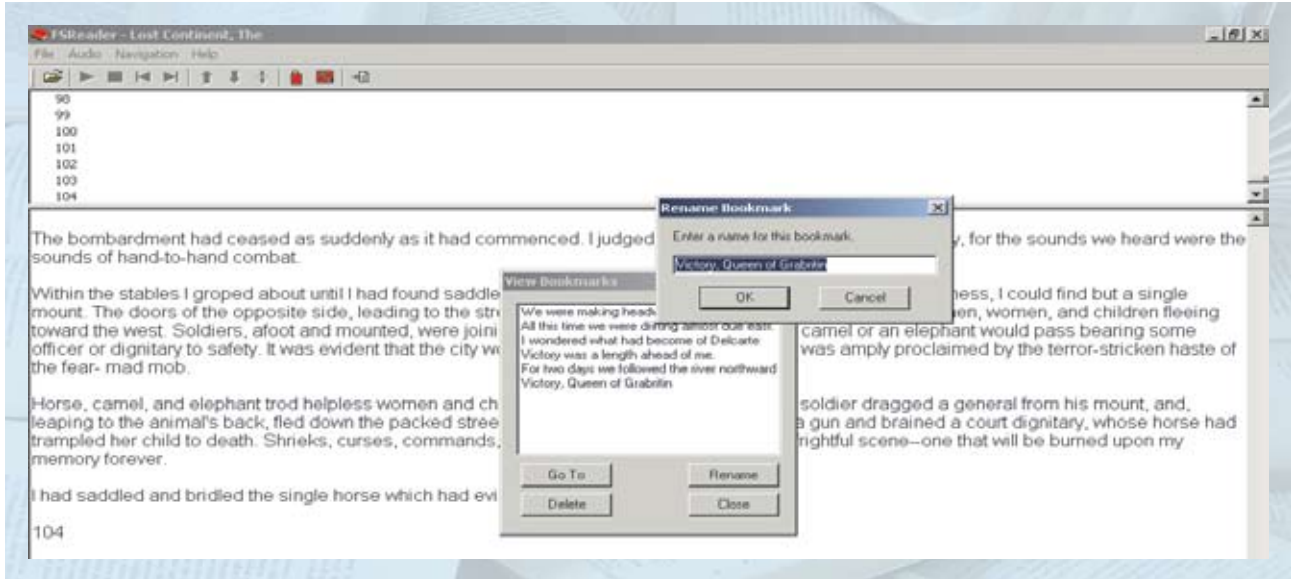

### Reading books has never been so efficient

**FSReader** provides multiple ways to get through material more rapidly with ease and increased comprehension. Switch between recorded audio and text with synthesized speech. Read along with audio using one of Freedom Scientific's refreshable braille displays. **FSReader** also provides full JAWS® support.

Read it your way. Read with **FSReader**.
